The image shows a complex industrial irrigation system. A large blue pipe curves from the left towards the center. It connects to a series of black cylindrical filter units mounted on a black metal frame. Each unit has the BOWNT logo and 'FILTRAZIONE IN ACCIAIO' printed on it. The units are arranged in a row, with multiple blue-handled valves and smaller pipes connecting them. In the background, more of the same equipment is visible, along with red pipes and a yellow shield-shaped logo on a metal structure. The setting appears to be an indoor industrial facility with concrete floors and white walls.
